

Finding your inner beauty should be a therapeutic experience.

And, with Power Peel microdermabrasion, it is.

If you're like most people, you will find Power Peel treatments to be relaxing and enjoyable. First, your skin will be cleansed and prepared with a gentle cleanser. The treatment itself will feel like a delicate, exfoliating scrub brushed over the surface of your skin. Following the treatment, your skin will be treated with specially selected products designed to soothe and moisturize. Facial massage is often used to help penetrate the moisturizer deeper into your skin.

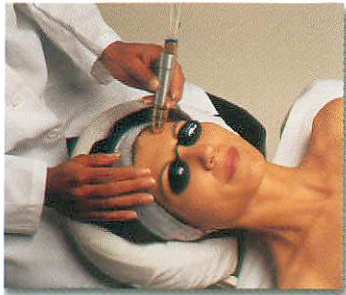

The entire process takes about 45 minutes. Immediately after a treatment, your skin will not only look healthier but also feel smoother and softer. Repeated treatments produce more visible results.

Don't stop there.

Maintaining the health of your skin requires daily care. Regular cleansing and moisturizing with specially selected products will help keep your skin fresh, toned and well-hydrated. Daily protection from the sun is essential.

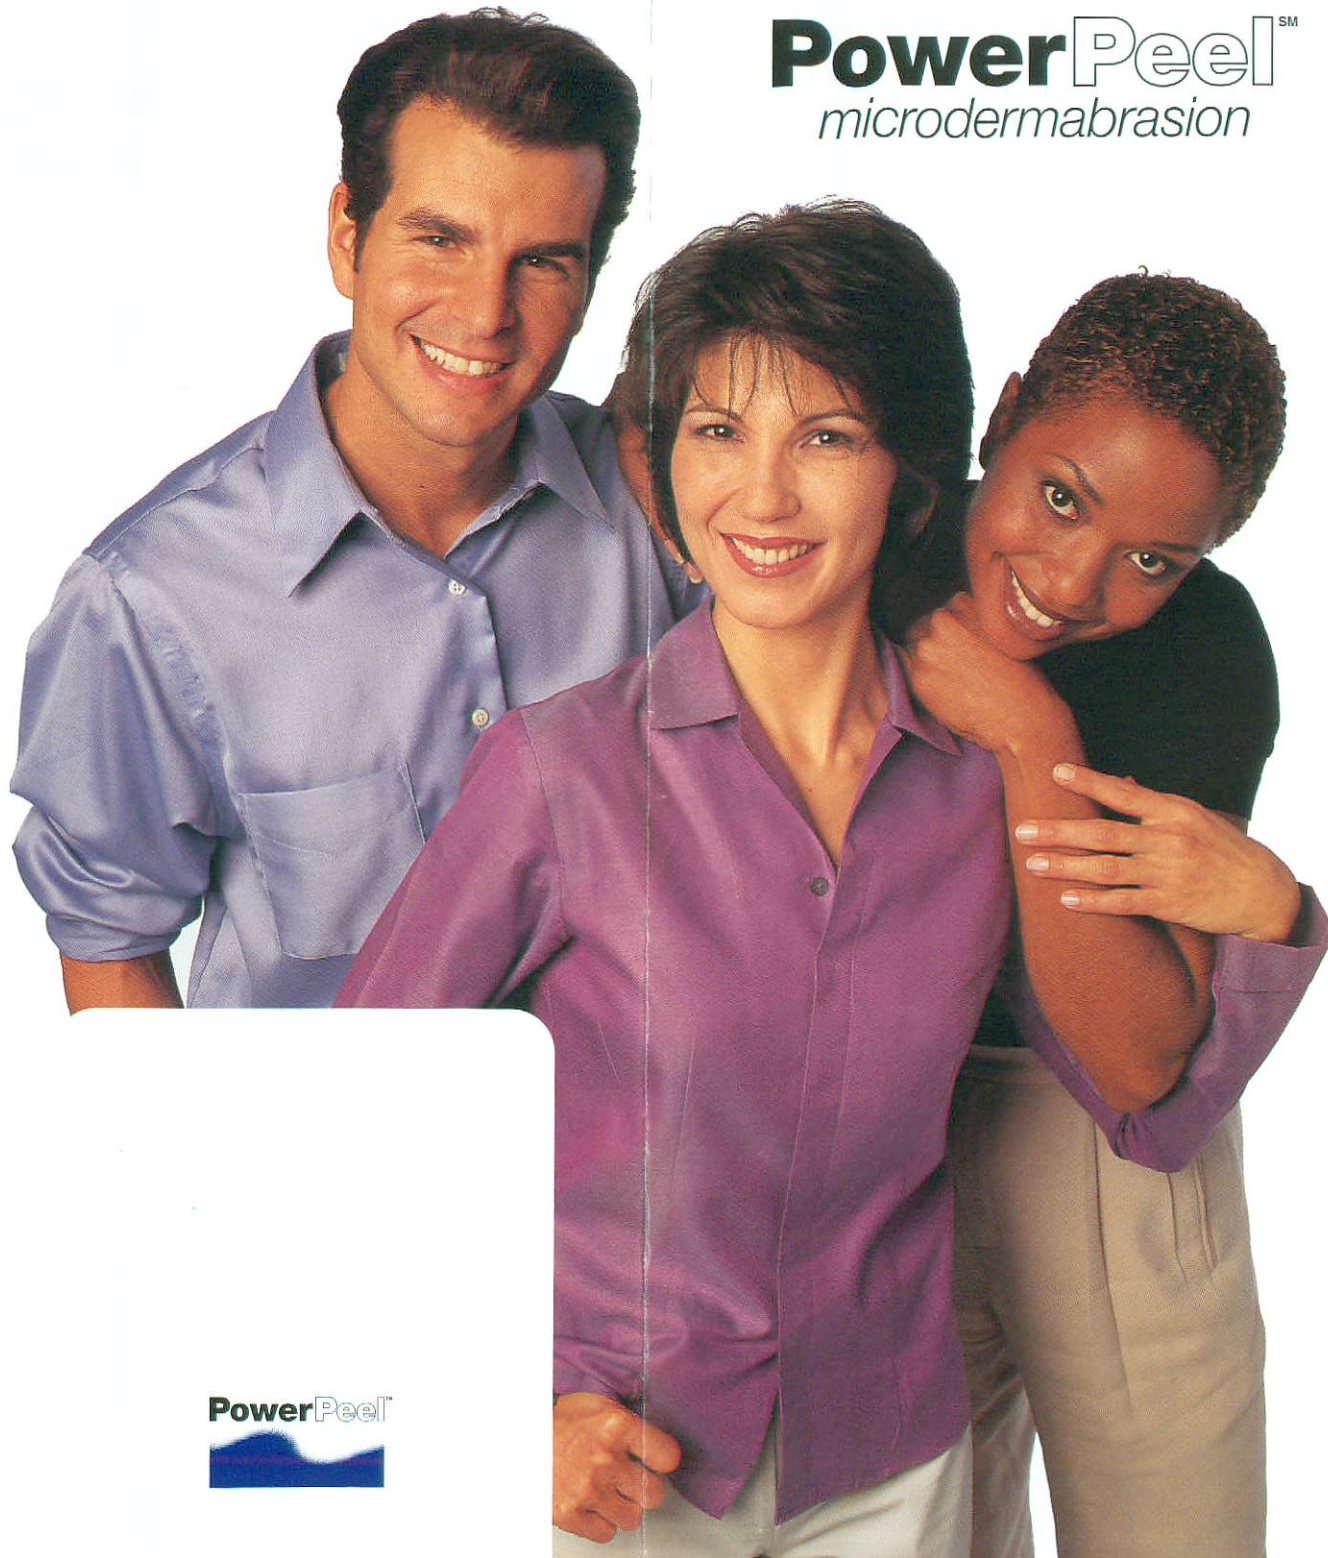

We recommend dermo 28® products for use during the course of your Power Peel treatments. Your physician or esthetician can recommend what they think is right for you.

To maintain the results you have achieved with Power Peel microdermabrasion, we recommend monthly treatments following your initial series.

PowerPeel® is a registered and pending trademark of Aesthetic Lasers, Inc.
Before & After photos are of actual patients. Your results may vary.

PowerPeelSM

**They say true beauty comes from within.
Actually, it's just beneath the surface.**

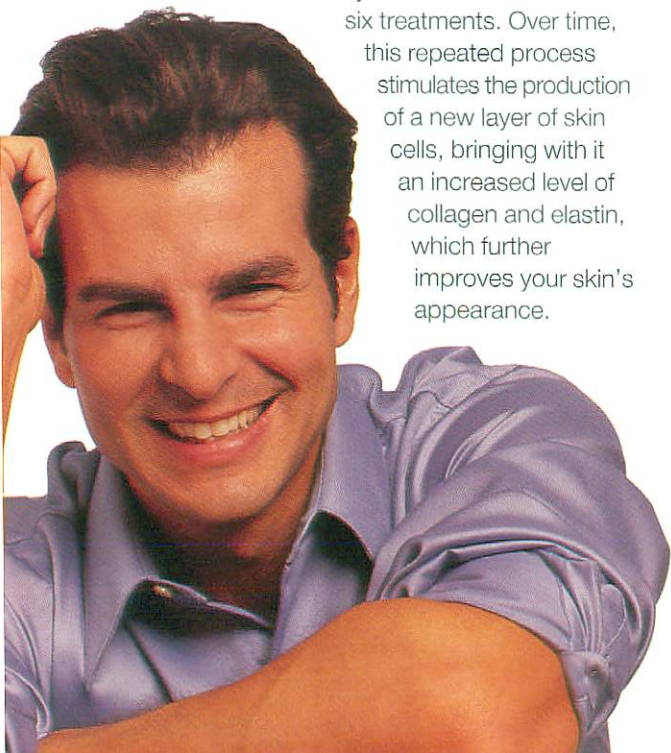

Your skin is the largest organ in your body, and maintaining its health is just as important as taking care of the rest of yourself.

Skin works hard to protect you from the sun, heat and cold. Over time, the environment's harmful effects will begin to show on the outer layer of skin the world sees.

**Put your best face forward with
Power Peel™ treatments.**

If you could remove that outermost layer of dry, dead skin cells, you would see that just below the surface lies a fresher, younger-looking face. That's exactly what Power Peel microdermabrasion treatments can do for you. By gently, precisely exfoliating the surface of your skin over a course of weekly sessions, Power Peel treatments whisk away years of dull build-up, revealing a more beautiful you.

Brighter, clearer and more evenly toned skin is waiting for you in as little as four to six treatments. Over time, this repeated process stimulates the production of a new layer of skin cells, bringing with it an increased level of collagen and elastin, which further improves your skin's appearance.

**Your skin is too precious to risk
on anything else.**

Power Peel is the leading microdermabrasion system for good reasons:

- Documented clinical results
- It is the system that created the entire microdermabrasion sensation.
- It is the most widely-used system in the United States today.
- Power Peel treatments take less time than many chemical or laser treatments.
- Power Peel treatments offer less discomfort and quicker recovery than most chemical or laser treatments.
- Power Peel treatments are affordable and safe for all skin types.

For healthier, clearer and more youthful skin, ask us about Power Peel treatments.

**Age is not the only enemy of
healthy skin.**

While Power Peel treatments are the leading non-surgical method to help reduce the appearance of fine lines, crow's feet and other signs of aging, they are just as effective in the treatment of:

- fine lines and wrinkles
- sun damage
- superficial scars
- uneven skin tone
- acne and acne scarring

By gently lifting away imperfections, Power Peel treatments will help improve the appearance of skin. In fact, it is safe to use on all skin types—male and female—and all skin colors, including Asian and African-American skin.
